CANADA TRANSPORTATION ACT REVIEW

SHAPING THE FUTURE

On February 25, 2016, the Minister of Transport tabled in Parliament the Canada Transportation Act (CTA) Review Report.

The Review was launched on June 25, 2014, and concluded on December 21, 2015 when it was submitted to the Minister of Transport by the Chair of the Review, the Honourable David Emerson, P.C., O.B.C.

The Review looked forward 20 to 30 years to identify priorities and potential actions in transportation that will support Canada's long-term economic well-being. The Report embodies many months of analytical work, significant public consultations and includes a number of recommendations.

ransport Action's reaction is that this is an important report that deserves serious consideration by the Federal Government, with the exception of the ill-considered recommendations to remove the subsidy from the VIA Canadian, reduce its frequency and that of the Ocean in Atlantic Canada.

The Review offers a blueprint for TC and the new minister; it identifies priorities that should be addressed. While there are several recommendations we take issues with, our overall response is positive. TA has chosen to focus its response on Section 8.3 Passenger Rail and Chapter 9 Air Transport which are of the highest interest to our members. Here are the issues:

RAII

We strongly support Federal initiatives to reduce conflict in areas of high rail congestion between freight and rail passenger traffic and in the long term an investment in dedicated rail networks.

It is extremely important the Government of Canada act to improve the fluidity of rail network. We endorse use of federal legislative power and infrastructure funding.

The current budgetary allocation should be used to fund a high-level examination of the VIA Rail plan, driven by TC, with a reputable consultant, with input from provinces, freight railways and VIA.

We strongly oppose elimination of Toronto - Vancouver subsidies due to the very limited reach of the existing tourism operator (to upper-income guests and running from Vancouver to the Rockies only) and the patchwork service replacement that would be required on VIA rail.

We note the difficulty of separating remote and intercity services from the tourism service. The perfect example is The Canadian versus The Rocky Mountaineer. The first one is in service year round, serves many remote locations and is coast to coast while the second is oriented exclusively to high-end tourists.

TRANSPORT ACTION

From page 1

Transport Action Canada strongly supports a feasibility study of a dedicated Montreal - Toronto corridor. This should be a Federal Government led initiative. Participants to include the provinces of Ontario and Quebec, VIA, the freight railways, with significant outside engineering and market expertise. Impact on highway congestion and competitive modes (Intercity Bus and Air) to be included.

We strongly encourages continuing financial support for the Montreal - Halifax service including efforts to reinstate daily service as means of making the service substantially more effective than the present tri-weekly operation.

Tri-weekly service actually worsened the financial situation of the Maritime service: half the numbers of passengers without a proportionate reduction in fixed costs.

We recognize a need to strengthen the passenger rail policy framework to avoid VIA Rail having to survive continually on razor thin annual appropriations. This framework once effectively implemented should lead to a VIA Rail Act giving the corporation a legitimate standing.

We emphasise the need for a legislative framework, and refer to the recent Auditor General's report. We emphasize the need for a legislative framework, and refer to the recent Auditor General's report. TAC continues to urge the adoption of a VIA rail Act in Parliament with powers similar to those enjoyed by Amtrak.

Governments need to work together; - in particular, collaboration between Ottawa and Ontario, in view of GO's operations west of Toronto and proposed provincially-supported high-speed rail is needed. To some extent this collaboration should extend to municipal governments.

There is a need to define route lengths for commuter versus intercity rail; some of the former are seen by TAC to be unnecessarily duplicative of VIA Rail (outer parts of Niagara Falls and Kitchener GO lines may be such).

The access to a key node of VIA Rail services, Toronto Union Station, is being limited following the takeover of the Station and trackage by Metrolinx, with VIA restricted to three platforms, and Go Transit wanting this to be further reduced.

AIR TRANSPORT

We substantially support the Review in relation to airport administration, airport security and consumer protection.

Chapter 9 of the Review (ref a) treats Air Transport which it describes as a "system based on competition, market forces and user pay". Transport Canada which has evolved into a policy-making and regulatory body is the landlord to some 22 larger airports, known as the National Airport System (NAS) operated by "not-for-profit" Airport Authorities. These Authorities are responsible to Transport Canada, under lease, for maintenance and improvements to their facilities. On termination of the lease, extensions are possible, the facilities are to be returned to the government.

Several quotes from the Review illustrate the current situation:

"Canada is unique amongst competitors in charging onerous rents and taxes that undermine competitiveness. Airport rents, for example, can represent up to 30% of airport operating, far more than would be expected in dividends and income tax from a private, for-profit airport, such as those in Europe";

"Security charges of up to \$25 per passenger have exceeded the cost of security screening by an average of 18% every year since 2010-2011 and fail to recognize the national interest in a secure system";

"Airport authorities in the NAS bear the additional burden of having to make payments to their municipalities in lieu-of-taxes. These payments can be substantial—and there is no requirement that they be aligned with property taxes levied against comparable industrial sites in those jurisdictions";

"The World Economic Forum ranks Canadian airports among the best in the world or infrastructure quality (16th) but 135th for cost".

We urge the abolition of the current airport lease payments and recommend that Transport Canada must devote other resources to maintain the smaller airports, and identify where the money is going to come from for the airports in the system beyond those 22 covered by the agreement, assuming that some of the money earned by TC/government from the 22 goes to supporting them. As these are generally those in more isolated areas (remote usually) loss of support for them would likely further erode their ability to exist. We owe a debt to some of those areas, with them supporting indigenous peoples, resource exploitation and even as a supply of basic training for commercial pilots (bush pilots). If there is indeed a cross-subsidy we would urge the Government to continue to subvene regional and remote airports from normal Federal resources derived from the Consolidated Revenue Fund. If that proves impossible, the lease payment should be reduced to the strict amount needed for the cross-subsidy only.

TAC - ELECTRONIC OR PAPER ?

Transport Action needs to update its communication methods with members. We want to shift to a shorter, more frequent and current, electronic format, limiting mailed copies. Mailing costs have risen significantly. While we understand that some members do not have e-mail, we need your cooperation in making this transition. We would appreciate members informing us on their preference. If you don't now receive the Newsletter electronically, please send us a brief e-mail (or phone message 613-594-3290) stating that you will accept electronic newsletters in the future, or that you definitely need a paper copy to: info@transportaction.ca

Proposal for a new rail network in Montréal

Proposals for the development of a 67 km automated metro eparate from the existing metro in Montréal have been unveiled by CDPQ Infra, a subsidiary of public pension and insurance investor Caisse de dépôt et placement du Québec that was established last year to study infrastructure projects suggested by the provincial government.

CDPQ Infra said the 67 route-km double-track *Réseau électrique métropolitain* would be the third-largest automated network in the world, after Dubai's 80 km metro and Vancouver's 68 km system. There would be 24 fully-accessible and climate-controlled covered stations, with options for a further five stops. There would be a fleet of around 200 cars, each with a capacity of 150 passengers, running as two-car sets off-peak and four-car sets in the peaks. Services would run every six to 12 min from 05.00 to 01.00 seven days a week. The cost of the project is estimated at C\$5·5bn, It is envisaged that construction could begin in spring 2017, with the first trains in service towards the end of 2020. — *railwaygazette.com*

Halifax transit improve real time information

alifax Transit is replacing its GoTime system with a new service that gives information to passengers based on global positioning technology installed aboard each bus.

The \$43-million system is called the Departures Line.

Passengers can call a single phone number (902-480-8000) to access the system and a pre-recorded voice will guide the caller

through the process. The caller will enter the bus stop number — printed on each bus stop sign — to hear which buses are departing, and at what time, from their stop location. The new system will also allow Halifax Transit to track where each and every bus is located, how long before it reaches each stop, and when there is a need to plan for increased service hours.

Halifax Transit is replacing 2,500 bus stop signs over the coming months to reflect the new Departures Line contact number. — *metronews.ca*

TA AGM in Toronto

Changing point

The latest AGM Held in Toronto on May 11th, 2016 was an opportunity for TA members to meet the new president, Mr Bruce Budd. Mr Budd has a long experience in public advocacy group and was a member of TA Ontario. Here's his word regarding the coming year.

The members of Transport Action Canada elected a new board of directors including me as your new President. I'm very pleased with the board members chosen at that meeting – a combination of new and returning folks with the experience and energy to drive our organization forward.

In accepting these new responsibilities, I addressed the need to pressure VIA Rail and especially the new government to expand our passenger rail services not only in the Windsor Quebec City corridor, but also in Atlantic Canada and out in Western Canada where new local train services are needed to compliment the Canadian, our one remaining transcontinental train.

I also mentioned that we will push for better integration of trains with inter-city bus and local transit services. Additionally, we have many internal upgrades to our organization. This includes an im-

Obituary

PETER JOHN LACEY Peter John Lacey of St. Vital died at home on May 10, 2016, at 68, after battling cancer and diabetes. Wellknown among railway enthusiasts, he was a director, a volunteer, a supporter, and a contributor to the Winnipeg Railway Museum, as well as a member of Transport 2000 and other transportation-oriented organizations. Pete was born in Holbeach, Lincs., England, in 1947, coming to Saskatchewan in 1957. He lived in Sturgis, Lintlaw, Weyburn, and Regina, achieving a B.A in Math from the University of Saskatchewan (Regina Campus). He worked as a computer systems analyst for Univac Computers in Regina and Winnipeg. Later he also worked for the Red River Community College, and as a freelance online editor and writer. He wrote a regular column for The Lance as a community correspondent for St. Vital. Pete published two history books (a third was in the works) about small Manitoba railways, and a technical railway catalogue. Among his hobbies, Pete's activities included hiking, canoeing, and camping. He was very interested in wildlife and conservation. Predeceased by his parents, Dorothy (Wilcox) and Cyril Lacey, Pete is survived by his brothers Steve (Dawn) in Yellowknife, and Nige (Collette) in Calgary, and their children and grandchildren. Family and friends will miss his dry wit and larger than life personality. A memorial event will be announced in the near future. If you wish, please make donations in his name to the Winnipeg Railway Museum.

Coming soon...
